

Environmental Policy

Recycling

We are aware that our operations can have an impact on the environment and are therefore committed to:

Increasing the positive environmental impact and seeking to reduce the negative environmental impact of our operations wherever possible.

Complying with legislative and ethical standards, concerning care of the environment.

Sourcing and supplying products with low environmental impact wherever possible.

Defining the methods for identification, control and disposal of products that have special handling and waste treatment needs.

Environmental improvements include:

Solar panel array installed on the roof of the building which covers a large percentage of our energy usage.

Timber products are recycled where possible, drums and pallets are being re-used or shredded to go for recycling.

Reduction in paper usage due to main processes being digitized.

Low energy lighting installed throughout the business.

Continual environmental improvement in respect of the products we sell, our internal use of resources and prevention of pollution.

Enquiries about any aspect of the environmental policies should be referred to
